

# BE WATER SMART

REGIONAL WATER PROVIDERS CONSORTIUM  
[www.conserveH2o.org](http://www.conserveH2o.org)

**1. How much water do you think your lawn needs each week?**

**2. TRUE OR FALSE:**

Dishwashers use twice as much water as hand washed dishes.

**3. If you want to get clean and save water, how long should your shower be?**

- (a) 1 hour
- (b) 5-minutes
- (c) 15-minutes

Answers: 1. 1-inch 2. False 3. (b) 5-minutes

## How much water is in a gallon?

The big plastic milk jugs are a gallon. Imagine using 36 of those to take a bath! Imagine pouring 300 of those on your yard every time you water your lawn! Here's an estimate of how much water it takes to do some common everyday activities:

Flushing a toilet = up to 5 gallons

Brushing your teeth = up to 4 gallons

Taking a Shower = up to 25 gallons

Washing your hands = up to 4 gallons
